Cheney Brooke Bostic

Urban Designer / Project Manager

LEED Accredited Professional

- University of Oregon, Eugene, OR; Master of Architecture, 2006
- Southern Illinois University, Carbondale, IL; B.S. Architecture, 2004

Cheney currently Project Manages and designs many of VMWP's urban design projects. Some recent projects include: Aiea-Pearl City Neighborhood TOD in Honolulu, HI; Clear Creek Transit Village in Adams County, CO; Waipahu Neighborhood TOD in Honolulu, HI; North End Station Design Guidelines in Thornton, CO; North Gate Center in Westminster, CO; and Superior New Town Center in Superior, CO. Each of these projects implement Transit Oriented Development and designing urban places around transportation options and the pedestrian. Cheney is also in charge of a national research project funded by the FTA: 'Land Use Planning for Transit Supportive Development: A Practitioner's Guide', working with the New Jersey Institute of Technology. Cheney also enjoys leading and helping with community charettes, which is a major part of the urban design process at VMWP. Cheney is also well versed in 3-D modeling (Sketch Up), which is another wonderful asset for urban design projects and a great tool for conveying ideas clearly and concisely to the client and the larger community.

Much of Cheney's graduate studies and research at the University of Oregon were based on the urban model and Transit Oriented Development. This is a core passion of hers in the world of architecture and urban design and has also been her focus at VMWP. Cheney looks forward to being a part of the next generation of architects who re-shape American cities. Cheney has travelled extensively throughout Europe and studied abroad in Rome, Italy. In North America, Cheney has studied urban design and planning in Portland [Oregon], Seattle, Sacramento, Vancouver, Honolulu, and Denver. Cheney brings a great level of technical knowledge as well as creative design to VMWP. Cheney is well versed in design and theory of architecture and urban design as well as technical and practical solutions. She is passionate about the environment and incorporates this thinking in every step of the design process. Cheney just recently fulfilled all of the IDP credit requirements and looks forward to begin taking the ARE licensing exams to become a registered architect. Cheney was recently Chair of the regional projects book committee that wrote a 130-page book titled *Colorado Urbanizing: Experiencing New Urbanism* for CNU 17 - the Congress for the New Urbanism's 17th annual conference in Denver, June 10-13, 2009 and she currently sits on the Board of Directors for CNU-Colorado Chapter.

Co-author of *Colorado Urbanizing: Experiencing New Urbanism*

Thesis project from University of Oregon was showcased at the 2006 National AIA Conference in Portland, OR.
