- Volunteer, First Place for Youth, Oakland, CA

EDUCATION

- Rensselaer Polytechnic Institute, Troy, NY; Bachelor of Architecture 1993
- Rensselaer Polytechnic Institute, Troy, NY; BS Building Science 1992

FIRM RESPONSIBILITIES

David is an Associate and Sr. Project Architect and is responsible for leading the project consultants and in-house team from conceptual design through construction administration. Besides leading some of VMWP's larger projects, his design sensibilities coupled with strong technical and construction experience make him a valuable mentor and staff resource. David's recent projects include: St Joseph's, a \$37 million, 159 unit affordable rental and for-sale historic rehab project in Oakland, and Valencia Gardens Hope VI, a \$50 million, 162 unit redevelopment project in SF.

PERSONAL PROFILE

David is a licensed architect in CA and GA with over 16 years experience in nearly every type of residential construction. He has acted as principal of his own firm prior to joining VMWP. He has contributed to the successful completion of award winning projects throughout the greater Atlanta and San Francisco Bay Area regions. As a Senior Project Architect at Van Meter Williams Pollack, David has focused on mixed-use urban infill projects providing affordable housing to the social economic population most in need and is heading up VMWP's student housing segment. David is an affordable housing advocate with an avid interest in sustainable design, and in particular, recycling of older buildings through adaptive renovation. Past projects include national park visitor center, state park lodge, golf course clubhouses, new retail warehouse or industrial office spaces, conversion of historic high schools or warehouses into loft apartments, retail space conversion to restaurant, high rise condominiums, custom single family residences, clustered town house units, large mixed-use urban infill projects and affordable housing.
