PERSONAL PROFILE

Before coming to the States, Pei-Chi had five-year practical experience as a licensed architect in Taiwan where he worked on a wide range of architectural design projects including transportation facilities, campus buildings, commercial, mixed-use and housing. Then he came to UC Berkeley to study in urban design, pursuing solid design training from different angle and broader context. As an architect and urban designer, he integrates his interdisciplinary expertise into diverse design approaches and comprehensive solutions, bringing in unique idea for individual project.
