The Maiker Uplands project is a four-story infill project in the Uplands neighborhood, Westminster's largest remaining open space. The project will incorporate a Headstart early learning space at the ground level. 70 total units feature balconies or patios at every unit, a fitness area at the ground level, a community laundry room at every level, as well as rooftop deck and multipurpose on the fourth floor with western-facing mountain views. The project will also frame and overlook the new public park directly east of the building along Decatur Street.

An on-site publicly-accessible sensory park space at the corner of Decatur Street and West 88th Avenue will feature plants that celebrate the senses of sight, scent, and touch. An outdoor public courtyard will allow residents access to relaxed seating, public art installations, and musical instruments under festoon lighting. Other various amenities include twenty bicycle parking spaces, a dog park, community garden, and an outdoor grill.

Design Features

- Fourth-floor amenity deck and multi-purpose room
- Headstart education space
- Balconies or patios at every unit
- Multi-story corners of brick
- Courtyard with fireplace, pergola, and children's play equipment
- Sensory gardens and a dog park as outdoor amenities

Green Features

- All-electric-ready building
- Photovoltaic panels on the roof of covered entries and carports
- EnergyStar requirements
- Low-water plant selection for landscaping
- On-site recycling collection
- Community planters and gardens
