PERSONAL PROFILE

As a partner and founder of Van Meter Williams Pollack, Fred for over two decades has worked at the forefront of mixed-use, pedestrian and transit-oriented planning and urban design. His focus as a leader in green and sustainable architecture has been designing urban infill on a scale that ranges from individual buildings to blocks, and includes mixed-use communities, adaptive re-use of buildings, and multifamily affordable housing. Fred has led many of the firm's larger and award-winning projects through the entire design and development process. Fred also manages the firm's business practice.

A LEED-Accredited Professional, Fred has worked closely with municipal and non-profit organizations to implement sustainable building practices. He serves on several technical advisory committees for developing green and sustainable architecture, including the Multi Family Green Building Guidelines Committee for the Alameda County Waste Management Authority and the steering committees for the Green Affordable Housing Coalition and the Zero Net Energy Housing Project in California.

Fred is a licensed architect in California and Hawaii. A graduate of the University of Colorado School of Environmental Design, he has traveled extensively worldwide, and for two years studied and worked as an architect in Denmark.
